Mr. Peter Masson Michigan Department of Natural Resources Jackson State Office Bldg. 301 E. Louis Glick Highway Jackson, MI 49201

Dear Peter:

Our field technicians were recently collecting water levels for the Albion-Sheridan Township Landfill site. In addition to collecting water levels from the wells that we installed during the RI, they also attempted to collect water levels from the four wells installed within the Orchard Knoll Subdivision. The key that they had in their possession (that had been provided by your office) did not match the lock that was on the wells. I spoke with Gene Hall of the MDNR Lansing office and asked him whether we could cut your locks. He indicated that he didn't have a problem with that. We have replaced those locks with our number 2402. This is the same key as on RI/FS wells also.

I am enclosing with this letter, two copies of the number 2402 key. I apologize for any inconvenience.

Thank you for your attention.

Sincerely yours,

WW ENGINEERING & SCIENCE Environmental Services

Dear Gene:

Please find enclosed a copy of the key (number 2402) that will fit the locks that we installed on the four wells installed within the Orchard Knoll Subdivision. This is the same key as on RI/FS wells also.

I apologize for any inconvenience.

Thank you for your attention.

Sincerely yours,

WW ENGINEERING & SCIENCE
